trufo

TRUFO LIBRARY LICENSE

Version 1.1.0 Effective November 8, 2026. Document ID: TF-LIB-1.1.0 Licensor: Trufo Inc., a Delaware corporation, 228 Park Ave S PMB 87518, New York, NY 10003-1502, United States ("Trufo")

This Trufo Library License (this "License") governs the Licensed Software identified in Section 1. By clicking to accept this License, by obtaining Credentials that enable download of the Licensed Software, or by installing, copying, or using the Licensed Software, you ("Licensee") agree to this License. If you are accepting on behalf of an organization, you represent that you are authorized to bind that organization, and "Licensee" means that organization. If you do not agree, do not install or use the Licensed Software.

1. Definitions

1.1 **"Licensed Software"** means the software packages Trufo makes available under this License, in object or source form, including: (a) the trufo-provenance package (Python import name tfprov), including its native code bridge for C2PA operations and any bundled certificate files; (b) the trufo-pawprint package (Python import name pawprint), including the Model Weights; (c) any other package, module, plug-in, or file that Trufo distributes with a reference to this License; and (d) all Updates. Licensed Software does not include Third-Party Components, which are licensed under their own terms (Section 6), or the trufo package published under the Apache License 2.0.

1.2 **"Model Weights"** means the trained machine-learning model parameters, architectures, configuration files, and associated data included in or delivered with the Licensed Software, whether in .pt, .onnx, .safetensors, or any other format, and any portion or derivative of them.

1.3 **"Trufo Services"** means the online services Trufo operates, including its content-provenance and signing APIs, the Trufo Certificate Authority, timestamping and certificate-status services, watermark identifier reservation and resolution, and the Trufo online portal.

1.4 **"Service Agreement"** means the agreement under which Licensee uses the Trufo Services: the Trufo Master Services Agreement and its Order Forms, if Licensee has entered into one, and otherwise the Trufo Terms of Service posted at trufo.ai/legal/terms-of-service as accepted by Licensee.

1.5 **"Credentials"** means the API keys, access tokens, package-index credentials, and other authentication data that Trufo issues to Licensee for access to the Trufo Services or the Licensed Software.

1.6 **"Identifier"** means a watermark identifier, reservation package, attestation, or similar value that the Trufo Services issue for embedding in or association with content.

1.7 **"Licensee Systems"** means computing resources owned, leased, or controlled by Licensee, including cloud instances under Licensee's account, and computing resources of Licensee's contractors used solely to provide services to Licensee.

1.8 **"Licensee Application"** means a software product or service developed by or for Licensee that incorporates or calls the Licensed Software.

1.9 **"Output"** means any manifest, signature, watermarked or fingerprinted content, detection result, or other data produced by operating the Licensed Software.

1.10 **"Third-Party Components"** means software, libraries, models, or data included in or distributed with the Licensed Software that are licensed under open-source or other third-party terms, including the C2PA software development kit derived from the c2pa-rs project.

1.11 **"Update"** means any patch, bug fix, new version, or replacement of the Licensed Software that Trufo makes available to Licensee.

1.12 **"Documentation"** means the user guides, API references, and technical documentation for the Licensed Software that Trufo makes available, including at trufo.ai/documentation.

2. Relationship to the Service Agreement

2.1 Scope. This License governs the installation and use of the Licensed Software on Licensee Systems. The Service Agreement governs Licensee's use of the Trufo Services, including fees, service levels, data handling, and the issuance and use of certificates and Identifiers. Where the Licensed Software is used with the Trufo Services, both apply.

2.2 Precedence. In the event of a conflict between this License and the Service Agreement, this License controls with respect to the Licensed Software and the Model Weights, and the Service Agreement controls with respect to the Trufo Services, and, where the Service Agreement is the Trufo Master Services Agreement, the liability provisions of that agreement govern liability under both documents as provided in Section 15.2. Nothing in this License reduces any restriction on the use of Trufo watermark technology in the Service Agreement, and nothing in the Service Agreement reduces any restriction in this License.

2.3 Acceptance record. Trufo may record the date, time, Licensee identity, and version of this License accepted, and may condition delivery of Credentials or of the Licensed Software on acceptance of the then-current version of this License.

3. License Grant

3.1 Grant. Subject to Licensee's compliance with this License and the Service Agreement, and for so long as Licensee holds valid Credentials, Trufo grants Licensee a limited, non-exclusive, non-transferable, non-sublicensable, revocable license to:

(a) install and execute the Licensed Software on Licensee Systems;

(b) make a reasonable number of copies of the Licensed Software for backup, archival, and deployment on Licensee Systems;

(c) incorporate the Licensed Software into Licensee Applications and operate those Licensee Applications on Licensee Systems, solely to create, sign, watermark, fingerprint, verify, or otherwise process content in conjunction with the Trufo Services; and

(d) use the Documentation in connection with the foregoing.

3.2 No distribution. The license in Section 3.1 does not include the right to distribute the Licensed Software, the Model Weights, or any Licensee Application that includes either of them, to any person other than Licensee's contractors under Section 1.7. The Licensed Software is designed to run within Licensee's own environment. Distribution of the Licensed Software as part of a Licensee Application to end users or other third parties, including pre-installation on devices, requires a separate written agreement with Trufo (an "Embedded Distribution Addendum"), which may impose additional conditions, including the use of builds that exclude decoding functionality and the flow-down of this License's terms to end users.

3.3 Reservation of rights. The Licensed Software is licensed, not sold. Trufo and its licensors reserve all rights not expressly granted in this License. No license is granted by implication, estoppel, or otherwise.

4. Restrictions

Licensee shall not, and shall not permit or enable any third party to:

(a) distribute, sublicense, rent, lease, lend, sell, publish, host, or otherwise make the Licensed Software or the Model Weights available to any third party, except as expressly permitted in Sections 3.1(c) and 3.2;

(b) reverse engineer, decompile, disassemble, or otherwise attempt to derive the source code, algorithms, model architecture, training data, or other non-public elements of the Licensed Software or the Model Weights, except to the extent that applicable law prohibits this restriction (including the rights to observe, study, and test the Licensed Software under Article 5(3) of Directive 2009/24/EC, which this License does not restrict), and, where the law permits the condition, only after first requesting from Trufo the information sought and allowing Trufo a reasonable opportunity to provide it;

(c) extract, copy, convert, quantize, prune, fine-tune, retrain, merge, or otherwise modify the Model Weights, or load the Model Weights into any software other than the Licensed Software;

(d) use the Licensed Software, the Model Weights, any internal representation or intermediate output of the Model Weights, or any Output to train, fine-tune, distill, calibrate, evaluate for the purpose of replicating, or otherwise develop any machine-learning model, watermarking method, watermark-detection or watermark-removal method, or content-provenance technology;

(e) embed, apply, or represent as a Trufo watermark any Identifier or payload that was not issued to Licensee by the Trufo Services for the specific watermark embedding action in question; use an Identifier whose reservation has lapsed or been withdrawn; or circumvent, forge, or replay any attestation or reservation package;

(f) modify the Licensed Software so as to produce manifests, signatures, timestamps, or Outputs that misrepresent the origin, history, or characteristics of content, or that would cause a Licensee Application to fail to conform to the C2PA specifications or the security requirements applicable to the Licensee's conformance level;

(g) remove, alter, or obscure any copyright, patent, trademark, license, or attribution notice in or on the Licensed Software, the Model Weights, or the Documentation;

(h) publish or disclose to any third party the results of any benchmark, performance, accuracy, robustness, or security test of the Licensed Software or the Model Weights without Trufo's prior written consent, which Trufo will not unreasonably withhold for peer-reviewed research that Trufo has had a reasonable opportunity to review;

(i) use the Licensed Software or the Model Weights to develop, train, or improve any product or service that competes with the Licensed Software or the Trufo Services;

(j) use the Licensed Software to probe, scan, attack, overload, or interfere with the Trufo Services, or to circumvent rate limits, authentication, or usage controls;

(k) use the Licensed Software in violation of applicable law, of the Service Agreement, or of any acceptable-use terms Trufo publishes; or

(l) use the Licensed Software after the Credentials associated with it have expired or been revoked, or after termination of this License.

Licensee shall not intentionally remove or tamper with any watermark, or any provenance metadata such as a C2PA manifest (Content Credentials), that the Licensed Software applies to content, or knowingly direct or assist others to do so. This does not apply to good-faith, legitimate processing in which changing or replacing that watermark or provenance metadata is necessary either to keep it accurate and functional after the content is edited, converted, or otherwise processed, or for a specific legitimate purpose such as a security audit or research.

5. Ownership; Model Weights; Feedback

5.1 Ownership. As between the parties, Trufo and its licensors own all right, title, and interest in and to the Licensed Software, the Model Weights, the Documentation, and all modifications and derivatives of them made by or for Trufo, including all intellectual property rights.

5.2 Model Weights as trade secrets. Licensee acknowledges that the Model Weights and the non-public elements of the Licensed Software are trade secrets and Confidential Information of Trufo, that they are provided solely to permit local operation of the Licensed Software, and that unauthorized access to, copying of, or use of the Model Weights would cause Trufo irreparable harm for which monetary damages would be inadequate. Licensee shall protect the Model Weights using at least the measures it uses for its own confidential information of like importance, and in no event less than reasonable care, and shall limit access to personnel and contractors who need access to operate the Licensed Software.

5.3 Output. Trufo claims no ownership of Licensee's content. Output that consists of Licensee's content, or of manifests and signatures describing Licensee's content, belongs to Licensee, subject to Trufo's rights in the Licensed Software, the Model Weights, and any Trufo-issued Identifier, certificate, or assertion embedded in the Output.

5.4 Feedback. If Licensee provides suggestions, enhancement requests, or other feedback about the Licensed Software, Trufo may use and incorporate it without restriction or obligation, and Licensee grants Trufo a perpetual, irrevocable, worldwide, royalty-free license to do so. Trufo will not identify Licensee as the source of feedback without consent.

6. Third-Party Components and Open-Source Precedence

6.1 Third-Party Components. The Licensed Software includes Third-Party Components, including a build of the C2PA software development kit derived from the c2pa-rs project, which is available under the Apache License, Version 2.0 and the MIT License. The Third-Party Components, and their applicable licenses and notices, are identified in the THIRD_PARTY_LICENSES file and the NOTICE file distributed with the Licensed Software.

6.2 Precedence of open-source terms. Each Third-Party Component is licensed to Licensee under its own license and not under this License. To the extent any term of this License restricts a right that the license of a Third-Party Component expressly grants with respect to that Third-Party Component, the license of the Third-Party Component prevails as to that component. Nothing in this License restricts Licensee's rights under the Apache License 2.0 or the MIT License in the c2pa-rs code as such. This License does apply to Trufo's modifications, the native bridge, the Python code, and the Model Weights, which are not Third-Party Components. Where a Third-Party Component is licensed under the GNU Lesser General Public License, Section 4(b) does not restrict modifying the Licensed Software for Licensee's own use with a modified version of that component, or reverse engineering it to debug such modifications.

6.3 Notices. Licensee shall retain the NOTICE and THIRD_PARTY_LICENSES files and all attribution notices in any copy of the Licensed Software, and shall reproduce them in any Licensee Application distributed under Section 3.2 to the extent the applicable third-party license requires.

7. Patent License; Defensive Termination

7.1 Patent license. Subject to this License, Trufo grants Licensee a non-exclusive, non-transferable, non-sublicensable license under Trufo's patent claims that are necessarily infringed by the Licensed Software as delivered by Trufo, to use the Licensed Software within the scope of Section 3. No patent license is granted for any combination of the Licensed Software with other software or hardware, for any modification, or for any use outside Section 3.

7.2 Defensive termination. If Licensee, or any entity controlled by Licensee, institutes or joins any claim, litigation, or proceeding (including a cross-claim or counterclaim) alleging that the Licensed Software, the Model Weights, the Trufo Services, or any portion of them infringes a patent, then all licenses granted to Licensee under this License terminate automatically on the date the claim is filed.

8. Connectivity, Telemetry, and Data

8.1 Service connectivity. The Licensed Software is designed to operate with the Trufo Services and communicates with Trufo endpoints (including api.trufo.ai, ca.trufo.ai, ocsp.trufo.ai, tsa.trufo.ai, test.api.trufo.ai, and regional equivalents) to reserve Identifiers, obtain signatures, certificates,

timestamps, and certificate-status responses, and record signing events. Distributed-signing operations transmit cryptographic hashes and manifest data, not the underlying media, unless Licensee elects a hosted operation.

8.2 Telemetry. In connection with those communications, the Licensed Software transmits to Trufo: the version identifiers of the Licensed Software and of the trufo package; a per-process session identifier used for server-side tracing; the Credentials used; and the request data required to perform the operation requested. The Licensed Software does not otherwise transmit Licensee content, Model Weights inference data, or system information to Trufo. Trufo may use telemetry to operate, secure, support, and improve the Licensed Software and the Trufo Services, and may disclose it only in aggregated or de-identified form. Trufo will document any material change to the categories of telemetry in the Documentation before the change takes effect.

8.3 Personal data. Trufo's processing of personal data in the Trufo Services is governed by the Service Agreement, any data processing addendum between the parties, and the Trufo Privacy Policy at trufo.ai/legal/privacy-policy.

9. Updates, Versions, and Deprecation

9.1 Updates. Trufo may provide Updates at its discretion. Updates are Licensed Software and are subject to this License or, if accompanied by a new version of this License, to that version upon Licensee's installation of the Update.

9.2 Version support. The Trufo Services may refuse requests from versions of the Licensed Software that Trufo has deprecated. Except where required to address a security vulnerability, a legal or regulatory requirement, or a change in the C2PA or CAWG specifications or conformance program, Trufo will give at least thirty (30) days' notice, through the Documentation, release notes, the Trufo online portal, or deprecation warnings returned in responses from the Trufo Services, before (a) deprecating a version of the Licensed Software such that the Trufo Services refuse it, whether by designating the version as deprecated or by raising the minimum supported version, or (b) making a backwards-incompatible change to the interfaces of the Licensed Software. The notice period runs from the first date on which the notice is published or the warning is first returned. Licensee is responsible for monitoring those channels and installing Updates within the notice period.

9.3 Pre-release status. Licensee acknowledges that the Licensed Software is designated as pre-release ("alpha") software as of the date of this License, that its interfaces and schemas may change between versions, and that Trufo may withdraw features.

10. Credentials and Identifiers

10.1 Credentials. Licensee is responsible for safeguarding its Credentials and for all use of the Licensed Software and the Trufo Services under them. Licensee shall not share Credentials outside Licensee and its contractors under Section 1.7, and shall notify Trufo at security@trufo.ai within twenty-four (24) hours of any suspected compromise.

10.2 Identifiers. Identifiers are issued by, and remain subject to the control of, the Trufo Services under the Service Agreement. Trufo may decline to resolve, or may suspend resolution of, any Identifier used in breach of this License or the Service Agreement, and may reallocate Identifiers whose reservation was not completed within the period stated in the Documentation.

11. Term and Termination

11.1 Term. This License takes effect on Licensee's acceptance and continues for so long as Licensee holds valid Credentials and complies with this License and the Service Agreement. It terminates automatically on termination of the Service Agreement, without prejudice to Section 11.4.

11.2 Termination by Trufo. Trufo may terminate this License immediately on written notice (including by email or portal notice) if Licensee breaches Section 4, Section 5.2, Section 6.3, or Section 13, or if Licensee's Service Agreement terminates or its Credentials are revoked. For any other breach, Trufo may terminate if the breach remains uncured thirty (30) days after notice.

11.3 Termination by Licensee. Licensee may terminate this License at any time by ceasing all use of the Licensed Software and complying with Section 11.4.

11.4 Effect of termination. Except as permitted under Section 11.6, on termination or expiration, all licenses granted under this License end, and Licensee shall promptly cease all use of the Licensed Software and the Model Weights, uninstall and destroy all copies (including copies within Licensee Applications and on backup media, to the extent technically feasible, and in any event within thirty (30) days), and on Trufo's request certify destruction in writing signed by an officer. Termination does not affect the validity of Output created before termination in compliance with this License and the Service Agreement, and does not affect Trufo's obligations regarding certificate status and timestamp services under the Service Agreement and the Trufo Certification Practice Statement.

11.5 Survival. Sections 4, 5, 6, 7.2, 8.2, 11.4, 11.5, 11.6, 12, 13, 14, 15, 16, and 18 survive termination.

11.6 Continued local decoding. Notwithstanding Sections 3.1, 4(l), and 11.1–11.4, following cancellation or non-renewal, the rights granted under this License continue solely to permit Licensee to retain and use lawfully obtained copies of the Licensed Software and Model Weights on Licensee Systems to decode watermarks and verify content lawfully watermarked by or for Licensee during the term, including subsequently modified copies of that content. This continued local use is royalty-free, does not require valid Credentials, and remains subject to the other applicable terms of this License.

Continued hosted identifier resolution and soft-binding maintenance, and retrieval and data egress for Trufo-hosted manifests, are governed by the Service Agreement and applicable fees.

12. Confidentiality

The Model Weights, the source code and non-public interfaces of the Licensed Software, pre-release features, and non-public Documentation are Trufo's Confidential Information. Licensee shall use them only as permitted by this License, shall not disclose them to any third party other than contractors under Section 1.7 who are bound by written obligations at least as protective as this Section, and shall protect

them in accordance with Section 5.2. These obligations continue for so long as the information remains confidential. If Licensee's Service Agreement contains confidentiality terms, those terms also apply, and the more protective term governs.

13. Export Control and Sanctions

13.1 Compliance. The Licensed Software may be subject to United States export control and sanctions laws, including the Export Administration Regulations and regulations administered by the Office of Foreign Assets Control, and to the import and export laws of other jurisdictions. Licensee shall comply with all such laws in its use of the Licensed Software.

13.2 Representations. Licensee represents and warrants that (a) it is not located in, organized under the laws of, or ordinarily resident in any country or territory subject to comprehensive United States sanctions; (b) neither it nor any person or entity that owns or controls it is identified on any United States government list of restricted or denied parties, including the Specially Designated Nationals and Blocked Persons List and the Entity List; and (c) it will not export, re-export, transfer, or make available the Licensed Software to any such country, territory, person, or entity, or for any end use prohibited by applicable law. Trufo may suspend or terminate this License immediately on reasonable belief that this Section has been breached.

14. Warranty Disclaimer

THE LICENSED SOFTWARE, THE MODEL WEIGHTS, THE DOCUMENTATION, AND ANY OUTPUT ARE PROVIDED "AS IS" AND "AS AVAILABLE," WITH ALL FAULTS. TO THE MAXIMUM EXTENT PERMITTED BY LAW, TRUFO AND ITS LICENSORS DISCLAIM ALL WARRANTIES, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, ACCURACY, AND ROBUSTNESS. WITHOUT LIMITING THE FOREGOING, TRUFO DOES NOT WARRANT THAT ANY WATERMARK WILL BE DETECTED AFTER ANY PARTICULAR TRANSFORMATION OF CONTENT, THAT ANY FINGERPRINT WILL MATCH, THAT ANY MANIFEST OR SIGNATURE WILL BE ACCEPTED BY ANY THIRD-PARTY VALIDATOR, OR THAT USE OF THE LICENSED SOFTWARE WILL SATISFY ANY LAW, REGULATION, OR STANDARD APPLICABLE TO LICENSEE, INCLUDING REGULATION (EU) 2024/1689 ARTICLE 50 OR CALIFORNIA BUSINESS AND PROFESSIONS CODE SECTION 22757 ET SEQ. LICENSEE IS SOLELY RESPONSIBLE FOR THE ACCURACY OF ALL ASSERTIONS, METADATA, AND CLAIMS IT CAUSES THE LICENSED SOFTWARE TO SIGN OR EMBED. THE FOREGOING DOES NOT LIMIT ANY EXPRESS WARRANTY IN THE SERVICE AGREEMENT WITH RESPECT TO THE TRUFO SERVICES.

15. Limitation of Liability

15.1 Exclusion. TO THE MAXIMUM EXTENT PERMITTED BY LAW, IN NO EVENT SHALL TRUFO OR ITS LICENSORS BE LIABLE UNDER OR IN CONNECTION WITH THIS LICENSE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, EXEMPLARY, OR PUNITIVE DAMAGES, OR FOR ANY LOSS OF PROFITS, REVENUE, BUSINESS, GOODWILL,

DATA, OR USE, OR COST OF SUBSTITUTE GOODS OR SERVICES, HOWEVER CAUSED AND UNDER ANY THEORY OF LIABILITY, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

15.2 Cap. TO THE MAXIMUM EXTENT PERMITTED BY LAW, TRUFO'S AGGREGATE LIABILITY ARISING OUT OF OR RELATED TO THIS LICENSE AND THE LICENSED SOFTWARE SHALL NOT EXCEED (A) IF LICENSEE IS PARTY TO A TRUFO MASTER SERVICES AGREEMENT, THE LIMITATION OF LIABILITY STATED IN THAT AGREEMENT, WHICH APPLIES TO THIS LICENSE AS A TRANSACTION DOCUMENT AND IS NOT INCREASED BY THIS LICENSE; OR (B) OTHERWISE, THE GREATER OF ONE HUNDRED UNITED STATES DOLLARS (USD 100) AND THE TOTAL FEES PAID BY LICENSEE TO TRUFO UNDER THE SERVICE AGREEMENT IN THE TWELVE (12) MONTHS PRECEDING THE FIRST EVENT GIVING RISE TO THE CLAIM.

15.3 Exceptions. Sections 15.1 and 15.2 do not limit (a) Licensee's liability for breach of Sections 4, 5.2, 12, or 13, or Licensee's indemnification obligations under Section 16; (b) either party's liability for gross negligence, willful misconduct, or fraud; or (c) any liability that cannot be limited under applicable law.

15.4 Basis of the bargain. The parties agree that these limitations are an essential basis of the bargain and apply notwithstanding the failure of the essential purpose of any limited remedy.

16. Indemnification by Licensee

Licensee shall defend, indemnify, and hold harmless Trufo, its affiliates, and their officers, directors, employees, and agents from and against all third-party claims, and all resulting liabilities, damages, penalties, costs, and expenses (including reasonable attorneys' fees), arising out of or relating to (a) Licensee's breach of this License; (b) any Licensee Application, and any content Licensee processes with the Licensed Software; (c) any assertion, metadata, identity claim, watermark, or other statement that Licensee causes the Licensed Software to sign, embed, or produce, including any claim that it is false, misleading, infringing, or unlawful; or (d) Licensee's violation of applicable law. Trufo will give Licensee prompt notice of the claim, reasonable cooperation at Licensee's expense, and control of the defense, provided that Licensee shall not settle any claim in a manner that imposes obligations on Trufo or admits fault on Trufo's behalf without Trufo's written consent.

17. United States Government Licensees

The Licensed Software and Documentation are "commercial computer software" and "commercial computer software documentation" developed at private expense, within the meaning of FAR 12.212 and DFARS 227.7202. Any use, duplication, or disclosure by or for the United States Government is subject solely to the terms of this License.

18. General

18.1 Governing law and venue. This License is governed by the laws of the State of New York, without regard to its conflict-of-laws rules. The parties consent to the exclusive jurisdiction and venue of the

state and federal courts located in New York, New York, except that Trufo may seek injunctive relief to protect its intellectual property or Confidential Information in any court of competent jurisdiction. The United Nations Convention on Contracts for the International Sale of Goods does not apply.

18.2 Equitable relief. Licensee acknowledges that a breach of Sections 4, 5.2, or 12 would cause Trufo irreparable harm and that Trufo is entitled to seek injunctive relief without posting bond, in addition to any other remedy.

18.3 Assignment. Licensee may not assign or transfer this License, by operation of law or otherwise, without Trufo's prior written consent, except to a successor in a merger or sale of substantially all of Licensee's assets that assumes this License in writing and is not a competitor of Trufo. Trufo may assign this License to an affiliate or successor. Any prohibited assignment is void.

18.4 Compliance verification. On Trufo's written request, not more than once per twelve (12) months, Licensee shall certify in writing its compliance with this License and, if Trufo has a reasonable basis to believe that Licensee has breached Section 4, shall provide reasonable information to allow Trufo to verify compliance.

18.5 Notices. Trufo may give notice under this License by email to the address associated with Licensee's Credentials, by notice in the Trufo online portal, or in the Documentation or release notes for matters covered by Section 9. Licensee shall give notice to Trufo at legal@trufo.ai, with security matters to security@trufo.ai.

18.6 Changes to this License. Trufo may revise this License and publish the revised version with its effective date on Trufo's website. For material changes, Trufo will give Licensee notice by posting a notice on Trufo's website or sending an email to the address associated with Licensee's Credentials, at least thirty (30) days before the effective date if the change materially and adversely affects Licensee. Licensee's continued use of the Licensed Software after the effective date constitutes acceptance of the revised License. Changes apply prospectively to use of the Licensed Software, including downloads and Updates, after the effective date and do not alter rights or obligations arising before that date. This Section is subject to applicable law and any controlling terms of a separately negotiated agreement between Licensee and Trufo.

18.7 Entire agreement. This License, together with the Service Agreement and the documents referenced in it, is the entire agreement between the parties regarding the Licensed Software and supersedes all prior or contemporaneous understandings regarding the Licensed Software, including any placeholder or interim license previously distributed with it. Purchase orders and similar documents of Licensee do not modify this License.

18.8 Severability; waiver. If any provision of this License is held unenforceable, it will be modified to the minimum extent necessary and the remainder will continue in effect. No waiver is effective unless in writing, and no failure to enforce is a waiver.

18.9 Independent contractors; no third-party beneficiaries. The parties are independent contractors. There are no third-party beneficiaries of this License, except that Trufo's licensors may enforce Sections 5, 6, and 14 as to their components.

18.10 Language. This License is written in English. Any translation is for convenience only.

Copyright 2025-2026 Trufo Inc. All rights reserved. "Trufo," "PawPrint," and the Trufo logo are trademarks of Trufo Inc.; no trademark license is granted by this License except as needed to identify the Licensed Software.
